Subject: BSAF and dietary analysis discussion

Hi Burt and Dana. As the more "routine" analyses swing into action, we need to get going on analyses for BSAFs and dietary risk analysis. Carrie is already compiling information for the dietary risk calculations (eco), but we would like your guidance before launching into any BSAF analyses. We have Jennifer's ideas on tissue analysis which will help, but I'm not sure you had decided on final ideas for how to handle BSAFs.

Could we hold a conference call sometime this week to discuss so we can get into action?
(b) (6), then the next two days are fairly open. When you are back in the office, let us know what might work.
-Bob
